PROFESSIONAL PROFILE

Frontend Software Engineer specialized in React and TypeScript, with experience building scalable and maintainable web applications. Passionate about creating intuitive user experiences, collaborating in cross-functional teams, and delivering high-quality software through modern frontend technologies, testing, and AI-assisted development. Currently expanding my expertise in Python and AI Engineering.

PROFESSIONAL EXPERIENCE

Frontend Engineer Intern

Barcelona Activa | Sep 2025 – Mar 2026

Development of complete functionalities, code maintenance, implementation of interfaces and collaborative work with backend, design and product teams of an educational web platform oriented to learning programming.

- Developed and delivered product features using **React** and **TypeScript**, employing **hooks** (useState, useEffect) for local state management and **Context API** for global management. Improved rendering **efficiency** by reducing unnecessary re-renders.
- Integrated **REST APIs** using **Axios**, handling loading states, error management, and **dynamic rendering**.
- Reduced code duplication and improved **scalability** by implementing a **reusable component** architecture.
- Developed and maintained unit tests with **Vitest** to ensure the stability of features and **prevent regressions** in the code.
- Worked closely with backend engineers to validate **endpoints** and product designers to deliver **production-ready** user interfaces.
- Translated **Figma** designs into **responsive, pixel-perfect** interfaces with a strong focus on usability and maintainability.
- Leveraged **Generative AI** tools and **MCPs** to accelerate software development, code analysis, test generation, and debugging tasks.
- Used **Docker** to run backend services and databases locally, enabling **API** consumption during frontend development.
- Collaborated using **Git** and **GitHub**, following feature-branch workflows, pull requests, code reviews, and version control.

Frontend Developer Freelance

Local business (Barbershop) | June 2024 – Sep 2024 | April 2026 – June 2026

Design and development of the digital presence of a local business, including website, basic branding and optimization of online visibility.

- Developed an initial **responsive** landing page using **HTML**, **CSS**, and **JavaScript**.
- Performed a complete redesign and technological migration of the website to a modern stack based on **Vue.js**, **TypeScript**, and **Tailwind CSS**, improving the **scalability** and **maintainability** of the project.
- Collaborated directly with the client to define and iterate on **requirements**, features, and visual **design** based on feedback.
- Creation of basic **branding** assets (logo, favicon and visual material for services).
- Set up and optimized the business profile on **Google Maps Business Profile**, reaching over 1,000 views.
- Implemented basic **SEO** practices to improve organic search rankings.

SKILLS

- | | | |
|------------------------------------|------------------------------|--------------------------------|
| • React | • Unit Testing (Vitest/Jest) | • TanStack Query |
| • Vue.js | • Git / GitHub | • Pixel-perfect implementation |
| • TypeScript | • Docker | • Storybook |
| • JavaScript | • Axios | • Figma |
| • HTML5 | • REST API Integration | • Python |
| • CSS3 / Tailwind CSS / Sass | • PostgreSQL | • RAG |
| • Responsive & mobile-first Design | • Redux, Context API | • LangChain |

EDUCATION

Bachelor's Degree in Software Engineering / Computer Engineering

Universitat Oberta de Catalunya (2022 - Present)

Frontend Development Bootcamp

IT Academy – Barcelona Activa / UPC (2025)
